MAGNACELL™

drainage cell

THE INNOVATIVE CONSTRUCTION OF DRAINAGE CELL HELP WATER TO FLOW NATURALLY AND EVENLY ACROSS SURFACE, PREVENTING GROUND SATURATION AND WATER CLOGGING.

MAGNACELL™ is designed for sub-surface water management for efficient drainage and to waterproof.

It is the ideal solution for many applications such as sports fields, roof gardens, retaining walls, feature ponds, driveways, car parks, etc.

MAGNACELL™ is designed based on Feng Shui “Bagua” as the 8 areas resemble various aspects of life. Wealth, Reputation, Love, Family and Health, Travel and Helpful acquaintances, Career, Wisdom, Children and Creativity are the main life areas.

Material	Polypropylene Recycled
Color	Black
Dimension	500mm X 500mm
Thickness	30mm
Weight	2,50 kg/m ²
Compressive strength	100 ton/m ²
Surface void area	65%
Internal void area	95%
Biological/chemical resistance	Good

FEATURES

- Lightweight modules that allows easy handling and installation
- Approximately 2% of gravel aggregate weight for the same discharge capacity
- More predictable drainage capacity than gravel
- Narrow profile enables a grater soil depth to be utilized in planter beds, compared to gravel, allowing the use of wider variety of landscape plants
- Relief of hydrostatic pressure on retaining walls
- Application on curved and irregular

ADVANTAGES

- Design flexibility
- Light weight and High compressive strength
- Efficient
- Easy installation - Large easy to join modules or pre-assembled panels allows rapid installation and minimize on-site disruption
- Storage and handling
- Environmentally friendly
- Durable
- Free maintenance
